2019 VISITING ARTIST ~ SETH BERNARD

Born and raised on Earthwork Farm in rural Northern Michigan, Seth Bernard was brought up in the folk and farmstead culture with an enriching integrative experience of the arts, agriculture, and community. In 2001, Seth founded Earthwork Music, a renowned Michigan-based collective of successful independent musicians who focus their efforts on environmental advocacy, social justice, creative empowerment and community building.

Seth has traveled the world and blanketed the US as a magnetic performer and uplifting cultural worker and is equally at home fronting a large electrified ensemble as he is holding a crowd with nothing but an acoustic guitar.

Seth “Eggs” Bernard is a NMEAC Environmentalist of the Year Award winner for Arts Education and has worked with SEEDS and On Stage for Kids bringing nature-based experiential creative powerment to young people across the Great Lakes region and beyond. In early 2018, Bernard launched the Clean Water Campaign for Michigan, a social movement using storytelling and music to amplify the groundswell of support for water issues.

Seth is a prolific songwriter and recording artist with 12 solo albums and a dozen more collaborative projects in his catalogue. He’s won 8 Jammie awards as a recording artist and producer, and has been a longtime iconic leader and steward of Michigan’s music community. His newest work, “Eggtones”, is a four album series released over the last 2 years to critical acclaim.

Royce Deans - Painting Expressively with Acrylics: Interpreting the Landscape  
Monday, August 19 - Thursday, August 22 from 10 am - 4 pm

The wonderful thing about painting is that we can say whatever we want to say with how we compose our paintings. Our use of color, texture, and composition are all elements that we can manipulate to express just how we feel about our subject. In this class we will explore many different forms of mark making and observe what those different brushstrokes communicate. This class is for artists who have a working understanding of painting with acrylics.

Monday, August 12 - Friday, August 16 from 10 am - 4 pm
Professor Qwbli’s Summer Camps offer unique opportunities for kids to develop their cognitive abilities, as well as motor functions and important life skills such as patience, cooperation, concentration, teamwork, perseverance and leadership in a setting that is just plain fun!
It’s an opportunity for them to let their imaginations run wild, explore their passions and discover new ideas. This year we are bringing some exciting twists to our camps with many elements from our most popular programs, such as TRAPPED! inside Professor Qwbli’s, Young Inventor Workshop, Maker’s Lab, Soaring Science, Sharp As A Tack and Professor Qwbli’s Cardboard Challenge.
While Summer Brain Drain is real, the elements of STEAM education (Science, Technology, Engineering, Art & Math) are woven throughout our week-long camp to stave summer’s effect on developing brains, let’s not forget it is summer! There will be lots of sunshine - 80% of our time is spent enjoying the outdoors!
